

Murdoch Drive Connection

to Roe Highway and Kwinana Freeway

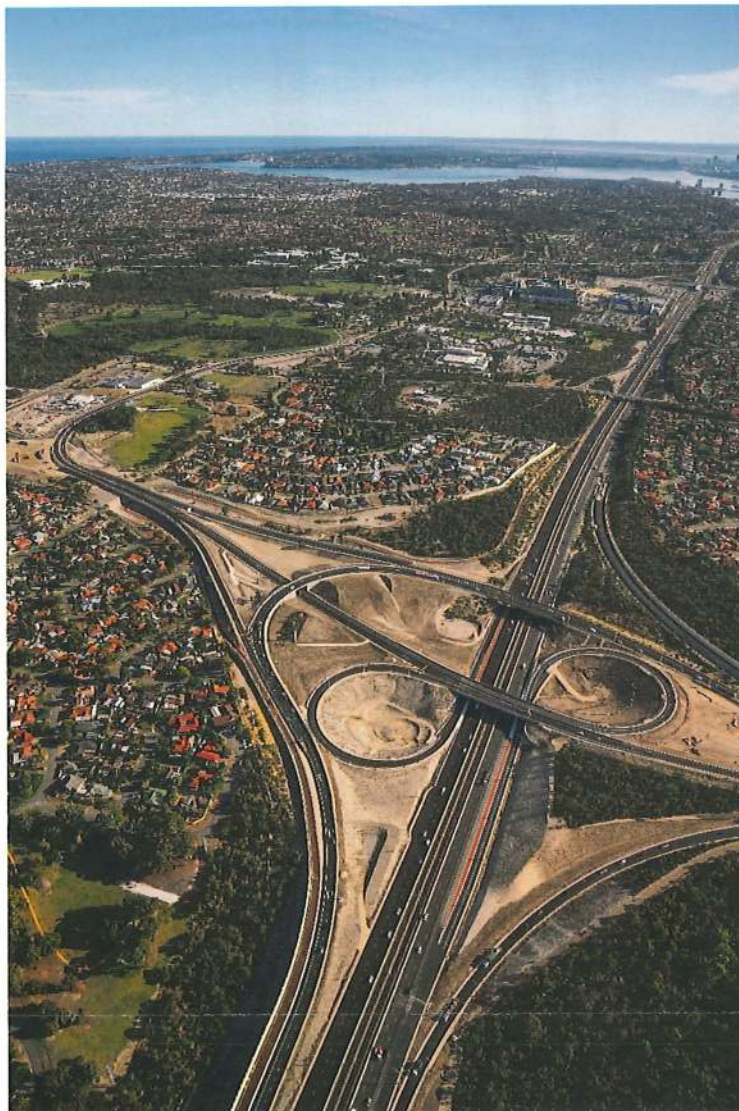

Construction Update

The Murdoch Drive Connection, a new southern access to Fiona Stanley Hospital and the Murdoch Activity Centre (MAC) from Kwinana Freeway and Roe Highway, is now open to traffic.

The extension, which had been planned for over 10 years as part of the MAC Structure Plan, will create shorter, more predictable journey times for those who work or live in the Murdoch Precinct, as well as visitors to, patients of, and emergency vehicles serving Fiona Stanley Hospital. The project forms another major milestone in the transformation of Perth's southern suburbs road network, being the second of seven major projects to complete construction.

We thank local residents, road users and cyclists for their patience during the construction period. To date the project team has:

- **Constructed three new bridges, with a total of 36 beams installed.** The Roe Highway Bridge has the longest bridge beams on the State road network, spanning almost 50 metres in length and weighing 190 tonnes each. They stretch from one side of the freeway to the other, with no supporting piers in the rail corridor.
- Delivered a section of the Kwinana Freeway Northbound Widening project from Bolderwood Reserve to Farrington Road, including **widening the Farrington Road on-ramp.**
- **Upgraded the Principal Shared Path (PSP) for pedestrians and cyclists** between Bolderwood Reserve and Farrington Road. A 5m-wide path will provide a smoother ride into the city and includes better lighting and upgraded access points to and from local suburbs.

BUILDING OUR FUTURE

WESTERN AUSTRALIA

- **Provided new access** to/from the Murdoch Activity Centre and Roe Highway, and to/from the Murdoch Activity Centre and Kwinana Freeway

New access to/from the Murdoch Activity Centre and Roe Highway

New access to/from the Murdoch Activity Centre and Kwinana Freeway

What's next?

April to July 2020

Minor finishing works will be carried out including maintenance and the establishment of the landscaping for the next three years. Landscaping will be finalised in the winter of 2020 giving the new vegetation the best opportunity to get established before next summer.

Some of this work will be supported by temporary traffic management involving reduced speed limits, lane closures and night works. Any significant interruptions will be advertised on the Main Roads Travel Map and emailed to those subscribed to project updates.

Please travel safe and pay attention to changed traffic conditions and speed limit signage.
